### Study Abroad Makes Students's World Wider

Study abroad is known as a good education to become competent children. Undergoing study abroad widens students's perspectives.

First of all, study abroad helps to look past to stereotypes. In the university, there are many international students from other countries. They may be some national stereotypes because of mass media and other sources. However, theses are not always true. There would be many different cultures because of exchange programs from other universities. These different cultures will give students new impressions. They can accept new cultures and enjoy international experiences.

Second, study abroad urges students to become independent. Living alone in other country is challenging. No someone to help them all time. They have to consider everything by themselves, decide, and communicate in a nonnative language. This gives them confidence and leadership. In addition, the education style is different. They might struggle by they will survive in a good and different educational environment. They will be able to develop their academic skill and ability to consider different problems.

Third, they can make new memory that they will never forget for rest of their life. They will experience things that they cannot be undergone in their home country. Each country has its own culture, traditional festivals, and food. For example, halloween is famous and popular in the U.S., but it is not familiar in Asia. It is totally fresh experience, and they can understand the details about

the country. These experiences will become good memories and treasures in their mind. It should encourage them when they are stuck in their life. Remember their friends and memories.

In conclusion, study abroad makes them change stereotype, promotes independent, and gives memories encouraging their life. These experiences will make their world wider, and their future will change dramatically.
